Languages: English and Romanian (native) · Spanish (beginner) Open to remote full-time or contract/B2B

SUMMARY

AI engineer who runs the whole stack in-house: multi-tenant WhatsApp AI agents on self-hosted Large Language Model (LLM) inference, with Retrieval-Augmented Generation (RAG) pipelines grounding each client's bot in its own knowledge. Built on 11 years of full-stack work, including a Web3 ecosystem serving thousands of users, engineered solo, plus 466 freelance projects rated 4.97/5.

SKILLS

AI/LLM: LLM integration, RAG pipelines, Ollama, self-hosted inference, embeddings, prompt engineering, WhatsApp AI agents

Infrastructure/DevOps: Linux, Proxmox, Docker, nginx, GPU passthrough, self-hosted deployment, Git

Languages: Python, JavaScript, TypeScript, PHP, SQL, HTML/CSS

Backend: Node.js, REST APIs, MySQL, WordPress (custom themes and plugins)

Frontend: React, Next.js, React Native (Expo), Tailwind CSS

Platforms: Meta WhatsApp Business Cloud API, Stripe, Web3/EVM

EXPERIENCE

Founder & Solo Full-Stack/AI Engineer — [Paraguay Online - Avina Bots](#)

Jun 2026 - Present

WhatsApp AI chatbot platform for SME clients: dental, restaurant, legal, and real estate verticals.

- Built a multi-tenant platform on the WhatsApp Business Cloud API (Meta Graph API): webhook routing per tenant, encrypted storage for each client's system user tokens and app secrets, and phone number migration handling
- Run all LLM inference and RAG in-house: Ollama serving Qwen3 14B on dedicated GPU hardware (RTX 3060), on a Proxmox cluster with GPU passthrough
- Sole developer end to end: architecture, deployment, client onboarding, and day-to-day operations

Senior Wordpress Developer — [Nylas](#)

Dec 2025 - Jun 2026 (fixed 6 months contract)

Contracted to implement the V2 design, complete site-wide visual update integrating on legacy theme

- Closely collaborated with marketing team & designer to implement over 40 different Figma screens
- Integrated on legacy WordPress theme, scope was only visual update while maintaining workflows
- Sole developer end to end: architecture, deployment, client onboarding, and day-to-day operations

Lead Software Developer — [HellCats NFT](#)

Jan 2022 - Dec 2024

Sole engineer for a Web3 consumer ecosystem with thousands of active users — took every system from idea to production and kept it running.

- Built six systems that work together: a soft-staking rewards platform, a marketplace with its own off-chain token economy, an NFT metadata upgrade flow paid in on-chain USDC, an individual asset reveal system, a randomized 1:1 swap pool, and a Twitter bot that helps users showcase their NFTs

- Handled wallet-based authentication, on-chain/off-chain state sync, and payment verification against the blockchain
- Designed the randomness, fairness, and anti-abuse mechanics for a token economy where balances carried real value
- Ran production alone: support, incident response, and iteration, with no team behind it

Freelance Full-Stack / WordPress Developer — [Codeable](#)

Jun 2021 – Present (part-time)

- 466 projects delivered for 113 clients at a 4.97/5 rating — verifiable at [Codeable](#)
- Custom themes and plugins, site rescues, and performance work, mostly for repeat clients

Full-Stack Developer — Viral Infotech Solutions

Sep 2017 – Dec 2025

- Maintained and built a portfolio of WordPress and custom (no-CMS) websites for a range of clients
- Improved site speed, accessibility, and search rankings through SEO and performance work
- Worked alongside designers and back-end developers to ship fully integrated projects

Web Developer — Increase Media

Feb 2020 – Jun 2021

- Modernized legacy codebases, which sped the system up by roughly 25%
- Built data pipelines feeding web analytics tools; clients included public figures such as Jordan Peterson

Junior Web Developer — Black Stone Texas USA

Jul 2015 – Sep 2017

- Turned PSD designs into hundreds of responsive HTML/CSS pages across dozens of WordPress and custom sites
 - Built MySQL-backed dynamic sites; handled migrations, bug fixes, and day-to-day client support
-
